

**Hansgrohe. Das Original.** With more than 100 years of company history, we are committed to tradition. At Hansgrohe, this means constant development and always being ahead of time. Continuous innovations from our think tank, which have set trends in the world of bathrooms and established worldwide standards, many design awards and numerous copies (which, however, never come close to the original) show that we are living up to our name. The best proof, however, is our many satisfied customers.

**Innovation and Design.** Designing products that last the lifetime of your bathroom, products that are both functional and a source of pleasure – this has always been our passion. From the first adjustable hand shower Selecta to Axor Starck bathroom fittings and the Raindance shower revolution, Hansgrohe has always had an extraordinary eye for innovation and design. For us, this means constantly moving forward and seeking ever better solutions. For you, it means always being able to find the answer to your needs at Hansgrohe.

**Technology.** Our showers and mixers offer many useful functions and details that make daily use as easy and comfortable as possible – so that you can enjoy your Hansgrohe products for many years.

**Fantastic Shower Fun.**  
By mixing in air, the spray becomes more voluminous and the water is used more efficiently.

**Steady performer.**  
Limescale and deposits are simply rubbed off, which ensures that the products function perfectly and look good for years.

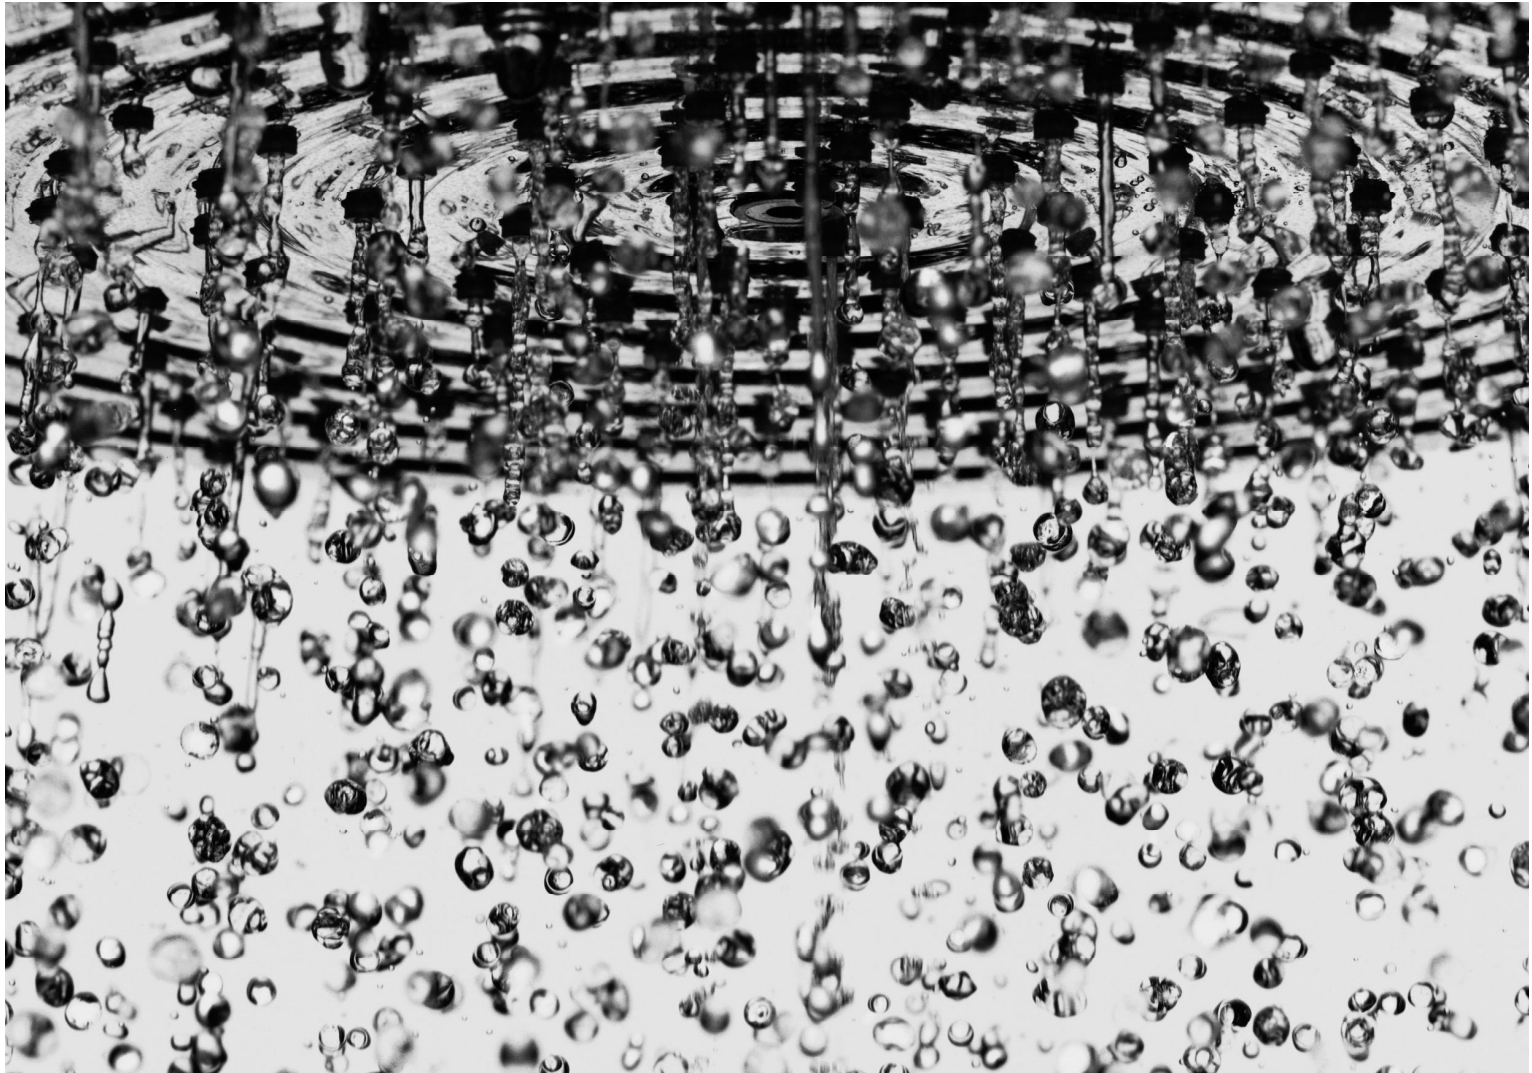

**Superior performance.**  
The extra-wide XXL showers provide extraordinary spray quality for unique Shower Fun.

**Sustainability.**  
From an environmentally friendly production process to the reduced water consumption of taps and showers.

**Exceptional comfort.**  
Through ergonomics: for example, our wash basin mixers allow you to wash your hands comfortably and at the perfect temperature without the spout getting in the way.

**Sustainability.** Hansgrohe spares no effort to ensure the safety and durability of all products and to meet health and environmental standards. This is achieved by clear specifications during product development, extensive application testing and quality management at all production sites.

**Solar energy at work.** Hansgrohe actively uses forms of renewable energy. Since 1993, we have generated solar energy on the roof of our Offenburg factory. We now generate up to 140,000 kWh of power every year.

**Multiple environmental award winner.** Among its many different environmental awards, Hansgrohe became the first industrial company to receive the official environmental prize awarded by the State of Baden-Württemberg in 1995 for its environmentally conscious business practices.

**Environmental standards.** Environmental protection is one of our priorities. The environmental standards that Hansgrohe has set for itself in most instances significantly exceed the industry-wide regulations.

**Cutting-edge electroplating methods.** To minimise the impact on the environment, while ensuring high-quality product surfaces, we have broken new ground in electroplating.

**High-quality materials.** Hansgrohe only uses high-quality materials that perfectly complement one another. This makes the products more durable, thereby conserving resources.

**Water-saving products.** Hansgrohe's commitment to water conservation is also reflected in the development of water-conserving products and water recycling systems ([www.pontos-aquacycle.com](http://www.pontos-aquacycle.com)).
